The People Who Make the Products that Make a Difference

IN THIS ISSUE:

- Honoring Their Sacrifice
- Service You Can See
- Blooming With Gratefulness
- New Packaging Options
- Always Going The Extra Mile

Honoring Their Sacrifice

This month, we honor the men and women who made the ultimate sacrifice defending our country. We take time to reflect on what it means to live in the land of the free, knowing that our freedom came at a cost. To our customers, friends, and family that are missing a loved one on this Memorial Day – we stand with you. Today and every day, we also honor our U.S. veterans and active military members who put their life on the line to protect our freedoms.

New Talent, New Beginnings

KEP welcomes Anthony Christopher to lead our new Biopharmaceutical Division as the company has successfully completed the biopharmaceutical validation data package following BPOG protocols.

"Healthcare has always played a vital role in my life growing up both good and bad, the more I can use my skills and talents to help others the better. I love to work and love to make a difference." - Anthony Christopher

Service You Can See

Karly is a true lifesaver for our internal operations AND customers. She provides assistance with customer orders and statuses, ensuring that all orders are fulfilled successfully and on schedule. On top of that, she saves us time and chaos by keeping internal procedures organized and orderly. We're not sure what we'd do without the immense value Karly brings to our company and customers!

Karly shared, "My best day at work is when I make a positive impact on both my customers and team members."

Karly's dedication to our customers and fellow employees saves us all. Now that's service you can see!

Anniversaries

We are blooming with gratefulness for our May anniversary employees! KEP wouldn't be the same without these incredibly hard-working team members. Congratulations to all on your hard work. And a special shout out to Dorothy Stein on reaching 44 years of service – what an accomplishment! Dorothy, we could not be more thankful to have you on our team!

Dorothy Stein – Winesburg – 44 years on 5/14
Gary Denning – Kent – 23 years on 5/22
Joseph Williamson – Kent – 6 years on 5/30
Bobbie Cupples – Winesburg – 5 years on 5/2
Adam Brady – Kent – 2 years on 5/24
Luis Perez – Mogadore – 2 years on 5/24
Abigail Whaley – Kent – 1 year on 5/23

Always Increasing Efficiency

We are thrilled to introduce KEP's latest offering - spooled medical, biopharma, and food grade tubing! Our new packaging option allows for longer lengths of tubing to be purchased on one spool, ranging from 250 to 1,000 feet. By reducing handling and potential contamination, this option gives you an easy and controlled payout during use. Additionally, spooled tubing reduces changeovers and can potentially lower costs depending on product size and line speed adjustments. We are excited to provide this new packaging option to our customers as a way to meet their unique needs and increase efficiency in their operations!

There are a few other benefits to purchasing longer length spooled tubing, including:

Reduced Waste: With longer lengths of tubing on spools, customers can cut the tubing to the desired length, which can reduce waste and save costs.

Increased Productivity: Since spooled tubing comes in longer lengths, it may help increase productivity by reducing downtime due to frequent changeovers.

Improved Storage: Spooled tubing takes up less space than coiled tubing, which can be beneficial for customers with limited storage space.

Customizable Lengths: Spooled tubing can be cut to the exact length needed for the application, which provides greater flexibility and customization options for customers.

Overall, spooled tubing provides a number of benefits to customers, including reduced handling and contamination potential, decreased changeovers, potentially lower costs, increased productivity, improved storage, and customizable lengths.

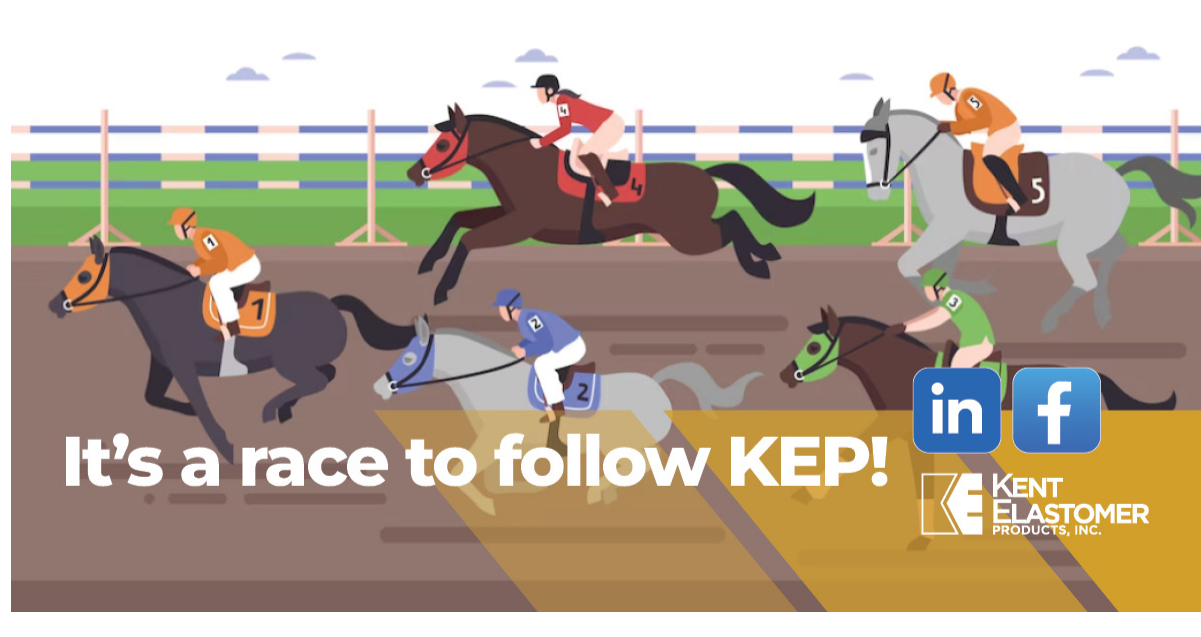

KEP leads the way in today's tubing and dip-molding manufacturing operations from three efficient Ohio facilities located in Kent, Mogadore, and Winesburg.
